

Brand book 2018

**A guide to using the graphic
elements of the June brand.**

Our purpose

“

June optimizes energy consumption and the corresponding costs to customers.

We do this by developing smart, innovative and digital energy services.

June analyzes and advises customers about the optimal choices in domestic energy management, based on their personal consumption. June assesses the individual behavior and preferences of the user so the advice is optimally catered to the day-to-day life of the specific user.

With this in mind June offers services that quickly and easily track and compare energy consumption, as well as innovative services and algorithms to lower customers' energy bill based on actual consumption, preferences, behaviour and profile.

June also develops and sells easy-to-install monitoring solutions to measure electricity, gas and water consumption. The patented June meter readers are battery-powered and can read energy meters even in places where there is no Internet connection available (through the gateway included in the package).

June meter readers are easy to install and easily click on the energy meter(s) thanks to the June attachment system.

Logo & tagline

june

Logo & tagline

Playfull, trustworthy and reliable.

Colours

june

Colours

Strong, playfull & POWER

There are 4 types of colours for June to use for graphic elements:

- | | |
|-----------------------|--|
| 1) Electricity | Sunglow Yellow #fad145 |
| 2) Gas | Picton Blue #4abae |
| 3) Water | French Blue #3087e8 |
| 4) June Brand | June Green #3bada8 |
| | June Red #e85257 |

Basic June colours to use on website, print, text and main elements.

Elements

Elements

Symbols, graphic elements for every “type” June has to offer

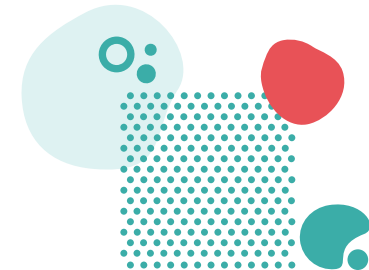

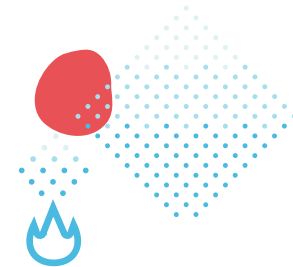

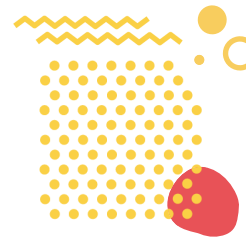

There are 4 types of colours for June to use:

- | | |
|-----------------------|--|
| 1) Electricity | Sunglow Yellow #fad145 |
| 2) Gas | Picton Blue #4abae |
| 3) Water | French Blue #3087e8 |
| 4) June Brand | June Green #3bada8
June Red #e85257 |

Each of these types has their own colour and graphic elements.

If you're using random elements, make sure to give them the **correct colour**/colour shade.

A combination is recommended if designing for the main June brand. The 'June red' can be included in every type to create contrast.

Images

Images

Symbols, graphic elements and images for every “type” June has to offer

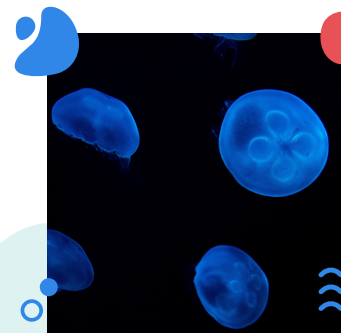

There are 4 types of images for June to use:

- | | |
|----------------|------------------------|
| 1) Electricity | Sunglow Yellow #fad145 |
| 2) Gas | Picton Blue #4abae |
| 3) Water | French Blue #3087e8 |
| 4) June Brand | June Green #3bada8 |
| | June Red #e85257 |

Each of these types has their own colour and graphic elements. Ideal images for these types need to have the same colour or shade in their image.

Images for a main June design should include a “June green” or “June red” colour/shade.

Junior

June

Junior

The main mascotte (also available in other characters)

Junior has a lot of emotions. Make sure he had the correct emotion at the correct time.

ex: WOW, June is amazing!
-> make him look happy/shocked/flabbergasted.

Because of his shape (no bodyshaming here) the best place to put him is in a corner on the bottom of the image on a light colour.

DONT use another shape in the same colour as Junior. He's the main character and he asks a lot of attention.

Social Media

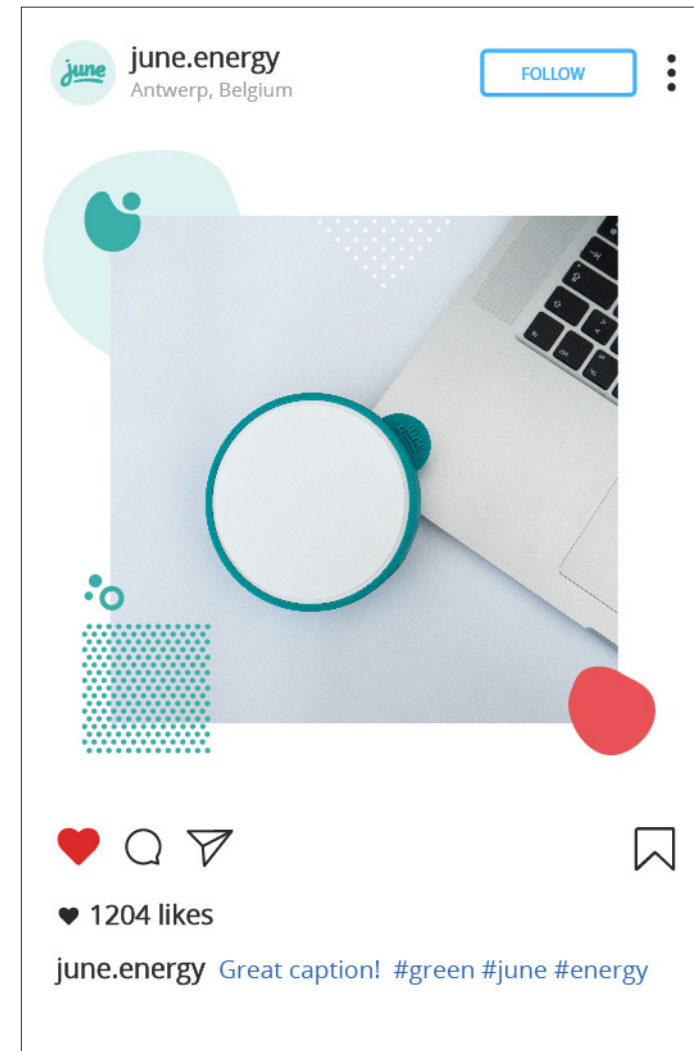

Social Media

The use of images/videos in social media

(If its a video specially made for June, just leave it like it is)

- Make sure you keep a big white stroke around the image so you can add some elements.
- same idea as general images. Use elements in the same colour/shade.
- Don't overuse it.
- Use at least 10 hashtags
- ***Make use of the templates we provide you***
